DATA ACQUISITION SYSTEMS (DAS) Service Providers

Many MassCEC renewable energy incentive programs require that the completed project report electrical generation to the online Production Tracking System (PTS) via an automated Data Acquisition System for a period of time (up to several years). Programs with this requirement include*:

- SREC systems over 10 kW (DC)
- Commonwealth Solar I and Commonwealth Solar Stimulus PV systems that are commercial and over 10 kW (DC). Commonwealth Solar II and Solarize Massachusetts projects do not require reporting regardless of size but may require reporting if selling SRECs.
- Community Wind
- Hydro
- Organics to Energy

*Note that this list is not intended to be comprehensive, and that project proponents should check with their MassCEC Project Managers regarding project requirements.

The following companies provide Data Acquisition Systems and related services. If you are a DAS provider and would like to add your company to the list below, please contact pts@masscec.com with your information.
