

CPS DATA ACQUISITION SYSTEMS (DAS) Service Providers

The Clean Peak Energy Standard (CPS) program requires all Clean Peak Resources to report resource performance to the online Production Tracking System (PTS) via an automated Data Acquisition System.

***Note that this list is not intended to be comprehensive, and that project proponents should check with their MassCEC Project Managers regarding project requirements.**

The following companies provide Data Acquisition Systems and related services. If you are a DAS provider and would like to add your company to the list below, please contact pts@masscec.com with your information.
